AB	Raw mixts. contg. .alpha.-CaSO4.0.5H2O (I), cement, and water are mixed with alk. acrylic or vinyl acetate resin emulsion, molded, and cured. Thus, a raw mix contg. I 60, cement 40, and Melment 1 part was mixed with acrylic resin emulsion (resin content 50%, pH 8.4) 10 and water 20%, molded, and cured for 2 wk to obtain a test piece having bending strength 136 kg/cm2. When it was subjected to 40 wetting-drying cycles, its bending strength was 127 kg/cm2 and no cracks were formed.				
ST	gypsum cement acrylic polymer composite				
IT	Cement (building materials, waterproof, contg. gypsum and acrylic polymers)				
IT	Acrylic polymers, uses and miscellaneous RL: USES (Uses) (in waterproof building materials from gypsum and cement)				
IT	Building materials (waterproof, from gypsum and cement, with acrylic polymers)				
IT	13397-24-5, uses and miscellaneous RL: USES (Uses) (building materials, waterproof, contg. cement and acrylic polymers)
